

Crossrail Surveys

Survey to provide key base information on existing services for the Crossrail team.

The sites being investigated are on a mixture of Network Rail and London Underground assets, and YJLi are able to offer expert knowledge of both management systems.

Programme constraints are tight, leading to extended working patterns which are exasperated by the distances between some of the access points and the work faces.

YJLi are pleased to be rising to these challenges and to be involved at this early stage in Crossrail's implementation.

Asset Owner	Other
Client	London Underground
Key Aspects	Survey work Mixed LUL and NR infrastructure
Contract Type	Preconstruction Support
Value	£ 2,300,000
