

## Wimbledon Shunters Cabin

A new facility for shunters at the Wimbledon depot throat, providing improved visibility, safety and facilities.

The new facilities we install will be positioned at the throat of the depot and will also include a relocated control panel.

Our scheme includes site preparation, demolition of existing structures, provision of foundations and services. The cabin will be prefabricated and delivered to a difficult to reach location without impacting the access and egress for the depot.

The cabin has enhanced office and welfare facilities and a greatly improved view of depot operations.

Asset Owner	Network Rail
Client	Network Rail
Key Aspects	Design & Build Limited site access Prefabrication
Contract Type	Design & Build
Value	£ 150,000
