

Paddington Information Booth

Creation of the new LUL information booth at Paddington to help customers with the Circle Line changes.

This scheme will deliver the strip out, alteration and refurbishment of the existing LUL information booth on the bridge at Paddington station.

Although the client for this project is LUL, the booth sits on Network Rail assets, so interfaces exist with both stakeholders.

Works underway at the adjacent Span 4 site add further stakeholders and restrictions on movement of labour and materials, which has to pass through sites controlled by two other contractors.

A fixed end date related to the Circle line changes adds a further challenge to this project.

Asset Owner Network Rail

Client London Underground

Key Aspects Difficult access
Tight programme
LUL project on NR infrastructure

Contract Type Design & Build

Value £ 300,000
