

Broxbourne Depot

Following successful projects at Tonbridge and Stowmarket, YJLi negotiated a package of works to Broxbourne Depot.

The scope at Broxbourne included the installation of a new water supply from the road (400m away) and provision of storage tanks so that the seasonal maintenance fleet could be refilled without bringing in tankers of water.

To create space, the existing area had to be reorganised, new fences and gates installed, containers and materials moved and new bases formed.
